Abdullah Zafar

Frontend Web Developer · abdullahzafar55025@gmail.com

Professional Summary

BSIT student in the 7th semester who builds clean, fast and responsive websites with HTML, CSS, JavaScript and Node.js. Completed an internship at Elite Digital Hub (Regd.) and has shipped several live business websites, an online store and two management portals. Looking for a junior frontend or web development role where I can build real products and keep learning.

Technical Skills

- **Web development:** HTML5, CSS3, JavaScript, Node.js
- **Other languages:** C++, C#, Java, Python, Assembly
- **Tools and practices:** Git and GitHub, VS Code, responsive design, web accessibility, Figma basics

Experience

Intern – Elite Digital Hub (Regd.)

- Applied web development skills in a professional team environment.
- Gained hands-on industry experience working on live client and business websites.

Projects

Elite Digital Hub – Agency Website (Next.js, Responsive, SEO) – elitedigitalhub.click

- Official website of an FBR-registered digital agency, presenting graphic design, web design, SEO, paid ads and printing services, practical courses, an admission form, a blog and policy pages.

Elite Digital Store – E-commerce (E-commerce, Cart and wishlist, Responsive) – store.elitedigitalhub.click

- Online store for custom sublimation printing with product categories, search, cart, wishlist, user sign-in and order tracking.

SkyNex Repair – Business Website (Multi-page, Responsive) – skynex.repair

- Website for a mobile repair shop and training institute covering repair services, online and onsite courses, an AI diagnostics page, a parts and tools store, and workshop details with directions.

EDH CRM Portal (CRM, Role-based access, Excel export) – abdullah-wd.github.io/Portal

- CRM portal with team login and owner console to manage items and stock, orders, invoices, expenses, users, tasks and reports, with monthly breakdowns, Excel export and data backup.

SkyNex Repair Portal (Portal, Login, Dashboard) – abdullah-wd.github.io/SkyNex-Portal

- Repair management portal with a secure team login and an admin dashboard for staff.

Madani Rishta (Responsive, Live website) – madanirishta.com

- Live responsive website built and published for the Madani Rishta project.

Education

BS Information Technology (BSIT) – Currently in 7th semester

- Coursework in programming, databases, networks and software engineering.

Self-study – Frontend Web Development

- Building projects with HTML, CSS, JavaScript and Node.js to learn by shipping.

Strengths

- Responsive, accessible and readable code
- Fast-loading pages and clean UI
- Quick learner who ships real projects
